A;Title: A brain serine/threonine protein kinase activated by Cdc42 and Rac1.

A;Reference number: $40482; MUID:94150588; PMID:8107774

A;Recession: $40482

A;Accession: $40482

A;Molecule type: mRNA

A;Residues: 1-544 <MAN>

C;Superfamily: unassigned Ser/Thr or Tyr-specific protein kinases; protein kinase hom C;Keywords: ATP; phosphotransferase; serine/threonine-specific protein kinase

F;267-520/Domain: protein kinase homology <KIN>

F;275-283/Region: protein kinase ATP-binding mottif
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        serine/threonine-specific protein kinase (EC 2.7.1.-) - rat

Serine/threonine-protein kinase PAK 1 (EC 2.7.1.-) (p21-activated
kinase 1) (PAK-1) (P65-PAK) (Alpha-PAK).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         T. Biol. 6:598-605(1996).

FUNCTION: THE ACTIVATED KINASE ACTS ON A VINCTION: THE ACTIVATED KINASE ACTS ON A VINCTION THE THE GTPASE EFFECTOR THAT LINK GTPASES TO THE JNK MAP KINASE PATHWAY.

SUBUNIT: INTERACTS TIGHTLY WITH GTP-BOUND CDC42/P21 AND RAC1.
                                                                                                                                                                                                                                                                                                                                                                                                                                        s SWISS-PROT entry is copyright. J. Biol. Chem. 272:22679-22684(1997).
-!- FUNCTION: CAN ACT ON SUBSTRATES SUCH AS MYELIN BASIC PROTEIN HISTONE IIA ON SERINE AND THREONINE RESIDUES.
-!- CAPALYTIC ACTIVITY: ATP + a protecin = ADP + a phosphoprotein.
-!- TISSUE SPECIFICITY: EXPRESSED PREDOMINANTLY IN LYMPHOID ORGAN.
-!- TISSUE SPECIFICITY: BYPERESSED PREDOMINANTLY IN LYMPHOID ORGAN.
SUCH AS SPLEEN, THYMUS, AND BONE MARROW.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        use by non-profit institutions as long as its content is in no way modified and this statement is not removed. Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
